Subject: 2nd Continuance on Grandon 9 MIT
Date: October 25, 2018 at 12:17 PM
To: Kerry Patrick patrickdev@sbcglobal.net

To add on to my earlier filing relating to this Docket where a Continuance was kindly granted.

I wish to request an additional continuance due to the Fact that on November 27, 2018, I will be having a 3rd Kidney Surgery to deal with Problems that affect the Aortic Tear in my Heart that I earlier requested this year with some major complications dealing principally with my Blood Pressure that result in myself regularly fainting due to bouts of Hypotension coupled the same day with Stroke levels of Blood Pressure.

The Cardiologists and Urologists at KU Med Center are not yet sure although they have been treating this issue since April, 2018.

I have been forbidden due to these above problems to drive for any extended time as of this writing and I am unsure when I will be able to come down to Wichita for any hearing.

But after talking to the Nurse for my Urologist, it is believed that for sure that I will be able to come down sometime in January.

Since I want to contest this matter and the Actions of the KCC Chanute Office in this matter.

I regret that my very serious health problems have prevented me from coming down to Wichita for a Hearing since the date of the Penalty Order.

I am sorry but I respectfully request this continuance particularly in view of the fact that the MIT has been performed on the Grandon #9 and it passed its MIT Test coupled with the fact that no water is currently being injected into the Well due to lease issues.
